- Fourth: Tony Brancati, Judd Bodycote
- Fifth: Jim Appledorn, Bill Thompson
- Sixth: Arnold Rounds, Bob Hines
- Seventh: Wiley Dunn, Page Stanley
- Eighth: Dale Hefke, Alf Englund
- Ninth: Jack Clark, Joe Goodrich
- Tenth: Marcelo Breton, Rich Davies
- Eleventh: Bill Luke, Chris Papastrat
- Twelfth: Don Santaniello, Bill Schmidt

CREDIT UNION ANNUAL MEET SET FOR THURSDAY, JAN. 22

On Thursday, January 22, EMR Sarasota Employees Credit Union will hold its Annual Meeting in the Cafeteria at 4:30 p. m. There will be refreshments and major door prizes: six shares in the Credit Union (\$30 value); two gift certificates; plus other gifts.

Business to be conducted at the meeting includes reports on the state of the Credit Union, and election of new members of the Board of Directors, Supervisory Committee, and Credit Committee.

Members of the Board and Committees during 1969 were:

Board of Directors: President, Bill Gregory; Vice President, James Bicknell; Secretary-Treasurer, Ruth LaCroix; Assistant Treasurer, Al Orr; and Board Members Jim Hawkins, John Moore, George Strait.

Supervisory Committee: Chairman Glen Johnson, Ed Annaratone, Larry Harmon.

Credit Committee: Chairman Marshall DuBois, Donna Edick, Carl Hendrickson, and Alternate Judy Amuso.

Vacancies to be filled at Thursday's election are: three places on the Board (to succeed Messrs. Bicknell, Moore and Orr); three members of the Supervisory Committee (to succeed Messrs. Johnson, Annaratone, Harmon), and two members

(Continued on Page 3)

Individual leaders for the season to date are:

Low Gross:

Jim Appledorn - 55

Low Net:

Wiley Dunn - 44

Low Putts:

Jim Appledorn - 25

WHO'S WHO — MONA NAINBY AND JEAN WERNET

To many customers and Field Office personnel, EMR in Sarasota is a voice on the telephone. When they phone EMR-T, usually the first voice they hear belongs to one of our veteran telephone operators-- Mona Nainby and Jean Wernet.

Mona Nainby joined EMR in January, 1963. A native of Burlington, North Carolina, she was switchboard operator at the County Hospital there for ten years. Her favorite activities are cooking, golfing and fishing with her husband, Frank. Mona and Frank Nainby (of EMR-T's Procurement Department) are an EMR romance--they met here and have been married for two years.

Mona's soft North Carolina drawl gives no hint of the fact that she lived in Germany for two years, back in 1956-1958. "It was a wonderful experience--getting to know the people in the small German town where I lived (Ludwigsburg, near Stuttgart). I also traveled throughout Germany, and to Switzerland and Holland.

"My landlord and his wife and five children liked to practice their English on me, and I learned how to make all kinds of German pastry and dishes. We used to go grocery shopping every day because we didn't have refrigeration. We kept 300-pound sacks of potatoes and apples, etc., in the storage cellar, and there were casks of homemade wine. The whole family, including the children, all went to the beer hall together to sing and enjoy that good German beer -- that's where I learned to like beer," Mona relates.

"Early Saturday mornings we headed for the town square where the farmer's market was set up each week by the farmers who came in from the nearby countryside," she recalls. "I still correspond with the family I lived with. I hope some day Frank and I can go to Germany on vacation and I can revisit Ludwigsburg."

Jean Wernet and Mona Nainby

Jean Wernet, who joined EMR in May, 1963, is a busy wife and mother of five. She's a native of Ohio, and had work experience as a PBX operator for Diebold Safe and Lock, and as a Bell Telephone long distance operator in Canton, Ohio.

Jean and Paul Wernet, who celebrate their 25th wedding anniversary this month, are the parents of two married daughters and two younger sons at home--Tommy, 14 and Steve, 11. Their son David, who was killed in Vietnam in 1967, was awarded the Bronze Star and Silver Star.

"We lived in Rhode Island and Virginia for a time while Paul was in the service. In 1957 we moved to Sarasota from Ohio, so our youngest son is a Cracker!" Jean says. "The boys are Scouts, and my husband is a Scout Master, so they go camping together."

Jean enjoys cooking, baking and sewing, when time permits. She also teaches Sunday School. For relaxation, there's fishing off the Venice jetties. "We caught some beautiful snook there a few weeks ago," she tells proudly. (Cont'd, Page 3)

NAMES IN THE NEWS....

CLYDE'S A WINNER

Remember a few months back when Clyde Brackett, of Microelectronics, submitted an entry in a contest run by EDN, an electronics magazine? EDN ran his poem entitled "Syntactical Static" under a special heading, "Scintillating Semantics." (See Pulse, October 3, 1969.)

Clyde has now received a note from EDN's Executive Editor. He says, "The editors think your 'Syntactical Static' so outstanding that they have voted to send you one of the third prizes offered. This is Heathkit's solid-state FM stereo table radio (kit GR-36)... Thanks for your creative entry..."

Clyde's originality has paid off -- the Heathkit is valued at \$69.95.

Incidentally, Heathkits are manufactured by Heath, of Benton Harbor, Mich., a Schlumberger company.

CREDIT UNION ANNUAL MEET SET FOR THURSDAY, JAN. 22

(Continued from Page 1)

of the Credit Committee (to succeed Donna Edick and Carl Hendrickson).

Bulletin board notices carry résumés of the candidates for the Credit Union posts, as nominated by the Board of Directors. Candidates may also be nominated from the floor by the members.

"All Credit Union members are urged to attend," says President Bill Gregory, "and we extend a special invitation to non-members to come to the meeting and learn more about the advantages of joining the Credit Union."

Both Operators are conscientious and enthusiastic about their jobs at the hectic EMR-T switchboard.

"Customers are sometimes amazed when we recognize their voices before they identify themselves when they call in," the Operators relate -- quite an accomplishment when you consider that our Operators handle 1600 different incoming and outgoing calls a day.

Jean and Mona place an average of 200 long distance calls a day, and there are 550 telephones in the EMR-Telemetry plant.

What can we do to help our Operators? The ladies are agreed that one of the most helpful things is for you to know the specific number and extension you need to call, and to keep on hand a list of numbers, thereby saving frequent calls to Information.

Libby Brown substitutes for our regular switchboard Operators when vacations or illness require. Libby's regular post is Stenographer in Manufacturing Engineering.

Libby Brown

Libby joined EMR-Telemetry in May, 1969, and worked in Special Systems before switching over to Manufacturing Engineering.

GET AN EARLY START ON YOUR INCOME TAX

It's early in the season--but if you'd like to get a head start on compiling the figures you need for your income tax, here are some numbers concerning 1969 medical insurance premiums under the EMR group insurance plan. You will need these figures if you itemize your deductions.

EMR pays for the medical and life insurance coverage for each EMR-Telemetry employee. You pay only for your dependents' coverage in our group medical insurance. The amount you pay depends on your own personal situation.

The following table gives the figures for 1969 medical insurance dependent coverage premiums and should be adequate information for most of us. If you've been with EMR less than a year, or if your dependent coverage changed, please call Diane Fisher, Ext. 292, in our Insurance Office, for the help you need.

1969 MEDICAL INSURANCE DEPENDENT COVERAGE PREMIUMS			
<u>Period</u>	<u>Spouse Only</u>	<u>Spouse & Child(ren)</u>	<u>Child(ren) Only</u>
52 weeks @	\$2.22/wk = \$115.44	\$3.60/wk = \$187.20	\$1.39/wk = \$72.28

EMR DECOMMUTATORS ORDERED BY U.S. NAVY

The U. S. Navy has awarded EMR-Telemetry a second contract for a quantity of EMR Model 515/516 PAM Decommutators. The EMR Decommutators will be used in support of Navy missile programs and will be installed in trailers located at various Navy world-wide range activities.

EMR's equipment will serve the Navy in its conversion from FM to high rate PAM for certain surface and air launch missiles, and this data acquisition method will become the primary data source for most of the Navy's major missile programs in the 1970's.

NEWEST ADDITION

One of EMR-T's latest acquisitions is this new step van which replaces our old van and station wagon. The new van is used for mail pick-up and delivery as well as other incoming and outgoing shipments. The van averages between 400 and 500 miles a week.

Eddie Sleeman, of Receiving, looks on as Gene Waldrop and Joe Barnett, of EMR-T's Paint Department, hold the silk screen used in applying the EMR logotype.

The EMR Decommutators are made up of recently-introduced Model 515 PAM Synchronizers and 516 Demultiplexers. The new units are suited to applications such as the Navy's Terrier, Talos, Tartar, Sparrow, Sidewinder and Chaparral missiles.
