

SUBSYSTEM FOR NASA SKYLAB is tested for electromagnetic interference in ECI's Environmental Testing Lab. Produced by EMR-Telemetry of Sarasota, the unit (background) is a data transmission system interface box which will be used in the Skylab airlock module produced by McDonnell Douglas. From left are Howard Jory and Ray Stinchcomb of McDonnell Douglas, Len Zeiler, Burt Stauffer and Sam Berryman of EMR-Telemetry and John Pillis of ECI. The Environmental Test Lab does a thriving business in testing equipment for other manufacturers.
